PROFESSIONAL SUMMARY

Computer Applications graduate, currently completing an MCA, with hands-on project experience across the full stack: web information systems, an agricultural e-commerce and recommendation platform, and a multi-app Android food ordering and delivery system. Skilled in Python (FastAPI), PHP, JavaScript and relational databases, with practical exposure to authentication (JWT, OTP), real-time updates via WebSockets, and role-based access. A quick learner who documents his work well and is looking for an entry-level software or application development role.

PROJECTS

FOOD TRUCK DELIVERY SYSTEM — MCA PROJECT

Python, FastAPI, Java, XML, SQL/SQLite, Retrofit, Docker

- Planned an ordering and delivery platform with three native Android apps: customer, food-truck owner and rider.
- Designed WhatsApp OTP login, JWT-based access, menu management and live order status tracking.
- Added WebSockets, location support and delivery workflows.

AGROFERTILITY — SMART AGRICULTURE PLATFORM

PHP 8.3, MySQL, Apache, Role-based access control

- Concept for an agri e-commerce platform with soil, crop and season-based fertilizer recommendations.
- Covers cart and order workflows, delivery-agent tracking, government scheme info and GST invoice generation.

AUTOHUB INFO — BCA PROJECT

HTML, CSS, JavaScript, PHP, MySQL

- Built a car information site with brand/model details, price filtering and comparisons.
- Included an EMI calculator and a test-drive booking form.
